Question No: 1

Multi Choice Type Question

[Report Error](#)**Common content**

The following pie-charts show the earnings and expenditure of the nation from January 1999 to January 2000.

BREAK-UP OF NATIONAL INCOME AND NATIONAL EXPENDITURE

Note: Assume that Rupee Earned = Rupee Spent, i.e., expenditure is equal to income.

Question

If income earned by 'customs' increases by 70% and income spent on 'others' decreases by 30%, then find the difference between the new percentages of the two categories?

☐ 15%

☐ 40%

☐ 33%

☐ 12%

CORRECT

Status: Wrong

Mark obtained: 0/1

Hints used: 0

Level: Medium

Question type: MCQ Single Correct Subject: Aptitude

Subject: Reasoning Ability

Subject: Data Interpretation

☒ Show solution

Solution 1:

Increase in customs = $170/100 \times 12$

Question No: 2

Multi Choice Type Question

Report Error

Decrease in others = $70/100 \times 12$

Common content

Difference = $204 - 84$

The following pie charts show the earnings and expenditure of the nation from January 1999 to January 2000.

BREAK-UP OF NATIONAL INCOME AND NATIONAL EXPENDITURE

Note: Assume that Rupee Earned = Rupee Spent, i.e., expenditure is equal to income.

Question

If the sectoral allocation is to change so that our country spends as much on industrial development as on agriculture (with total spending on industrial development and agriculture remaining the same), then the allocation of agricultural sector should reduce by approximately

☐ 28.13%

CORRECT

☐ 17%

☐ 36%

☐ 48%

Status: Wrong

Mark obtained: 0/1

Hints used: 0

Level: Medium

Question type: MCQ Single Correct

Subject: Aptitude

Subject: Reasoning Ability

Subject: Data Interpretation

☒ Show solution

Solution 1:

Total spend on agriculture and industry = $32 + 14 = 46\%$

If total spendings on industry and agriculture are the same then 23% will be spent on each.

Required reduction = $9/32 \times 100 = 28.13\%$

Question No: 3**Multi Choice Type Question****Report Error**

Each of the questions below consists of a question and two statements numbered I and II given below it. You have to decide whether the data provided in the statements are sufficient to answer the questions. Read both the statements and give an answer.

Clinton is standing 2 steps to the left of a red mark and 3 steps to the right of a blue mark. He tosses a coin. If it comes up heads, he moves one step to the right; otherwise, he moves one step to the left. He keeps doing this until he reaches one of the two marks and then he stops. At which mark does he stop?

- I. He stops after 22 coin tosses.
II. He obtains 2 more heads than tails.

- ☐ If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question
- ☐ If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.
- ☐ If the data in Statement I alone or in Statement II alone are sufficient to answer the question. **CORRECT**
- ☐ If the data in both the Statement I and II are not sufficient to answer the question.
- ☐ If the data in both the Statements I and II

together are necessary to answer the question

Status: Correct Mark obtained: 1/1 Hints used: 0 Level: Hard
Question type: MCQ Single Correct Subject: Aptitude Subject: Reasoning Ability
Subject: Data Sufficiency

☒ Show solution

Solution 1:

Statement A: To reach the Red mark, Clinton needs to take an even number of steps and to reach the Blue mark, he needs to take an odd number of steps.

Given that the number of steps taken by him is 22.

Therefore, Clinton stops at the Red mark. Hence, statement A alone is sufficient.

Statement B: If the number of heads is 2 more than the tails, then the effective movement will be 2 steps to the right, i.e. Clinton will reach the Red mark.

Hence, statement B alone is sufficient

Question No: 4

Multi Choice Type Question

Report Error

Common content

Eight Persons are sitting around a square table, four of them sit at four corners facing inside while four sits at the middle of the sides facing outside. B sits third to the left of D. H sits second to the left of B and G sits third to the left of H. F is an immediate neighbour of D. A sits third to the left of the one who sits second to the left of F. E does not sits at corner. C sits immediate right of B.

Question

Four of the following are alike in a certain way so form a group, which among the following does not belong to that group?

☐ B

Report Error

Which symbol will be on the face opposite to the face with the symbol *(asterisk)?
 From case 1 diagram, we can see that it's not necessary for some shoes to be gloves.

shirts to be gloves. Hence,

es. Hence, conclusion III

From both diagrams, we can see that it is not necessary for all gloves to be shirts. Hence, conclusion IV doesn't follow.

Therefore, option A is the correct answer.

☐ @☐ \$☐ 8

CORRECT

☐ +**Status:** Correct**Mark obtained:** 1/1**Hints used:** 0**Level:** Medium**Question type:** MCQ Single Correct**Subject:** Aptitude**Subject:** Reasoning Ability**Subject:** Dice☒ Show solution**Solution 1:**

The symbol of the adjacent faces to the face with symbol * are @, -, + and \$.

Question No. 15 The required symbol is 8. **Multi Choice Type Question**

Report Error

Deepak tells Shyam "Your mother's father's son is the husband of my sister." How is Deepak related to Shyam?

☐ Cousin☐ Brother-in-law☐ Uncle

CORRECT

☐ Data inadequate**Status:** Correct**Mark obtained:** 1/1**Hints used:** 0**Level:** Medium**Question type:** MCQ Single Correct**Subject:** Aptitude**Subject:** Reasoning Ability**Subject:** Blood Relations☒ Show solution

Solution 1:

Father of Shyam's mother means Grandfather of Shyam.
The son of Shyam's grandfather is the husband of Deepak's sister.
In other words, maternal uncle of Shyam is the husband of Deepak's sister.
So Deepak is Shyam's uncle.

Question No: 16**Multi Choice Type Question****Report Error**

A man walks 40 m towards the north and he turns his left and walked 40 m. He then turns his left and walked 15 m. He finally turns his right and walked 20 m. How much is the distance from starting point to the end point and in which direction?

☐ 55m , Northwest☐ 36m, Northeast☐ 65m, Southeast☐ 65m, Northwest**CORRECT****Status:** Correct**Mark obtained:** 1/1**Hints used:** 0**Level:** Hard**Question type:** MCQ Single Correct**Subject:** Aptitude**Subject:** Reasoning Ability**Subject:** Direction☒ Show solution**Solution 1:**

$$40 + 20 = 60$$

$$40 - 15 = 25$$

$$? = \sqrt{60^2 + 25^2}$$

$$= \sqrt{4225} = 65\text{m, North West}$$

Question No: 17

B O M B A Y

Question No: 18

Multi Choice Type Question

Report Error

Statements:

Only a few Cow is Goat

No Kite is Sheep

Few Cow is Sheep

Conclusions:

- I. All Cow being being Goat is a possibility
- II. Some Kite is not Goat

- ☐ Both conclusion I and conclusion II follow
- ☐ Only conclusion II follows
- ☐ Only conclusion I follows
- ☐ Neither conclusion I nor conclusion II follows
- CORRECT

Status: Wrong

Mark obtained: 0/1

Hints used: 0

Level: Hard

Question type: MCQ Single Correct Subject: Aptitude

Subject: Reasoning Ability

Subject: Syllogism

☒ Show solution

Solution 1:

Since, only a few Cow is Goat is given which means some Cow is definitely not Goat so, the conclusion I does not follow.
All Kite can be Goat so, the conclusion II also does not follow.
Hence, option d.

Question No: 19**Multi Choice Type Question****Report Error**

A family has a man, his wife, their four sons and their wives. The family of every son also has three sons and one daughter. Find out the total number of male members in the whole family?

☐ 4☐ 8☐ 12☐ 17**CORRECT****Status:** Correct**Mark obtained:** 1/1**Hints used:** 0**Level:** Hard**Question type:** MCQ Single Correct**Subject:** Aptitude**Subject:** Reasoning Ability**Subject:** Blood Relations☒ Show solution**Solution 1:**

Man = 1

Man's 4 son = 4

4 son's has each 3 sons. = $4 \times 3 = 12$ Therefore, total number of male members in the family = $1+4+12 = 17$.**Question No: 20****Multi Choice Type Question****Report Error****Common content**

The following pie-charts show the earnings and expenditure of the nation from January 1999 to January 2000.

BREAK-UP OF NATIONAL INCOME AND NATIONAL EXPENDITURE

Note: Assume that Rupee Earned = Rupee Spent, i.e., expenditure is equal to income.

Question

If in the year 2000-01, earning and expenditure remain the same and internal borrowings are reduced by 50%, then by how much percent should other resources increase collectively?

☐ 10.2%

CORRECT

☐ 8.5%

☐ 13%

☐ 18%

Status: Wrong

Mark obtained: 0/1

Hints used: 0

Level: Medium

Question type: MCQ Single Correct Subject: Aptitude

Subject: Reasoning Ability

Subject: Data Interpretation

☒ Show solution

Solution 1:

Internal borrowings are decreased by 50%.

Internal borrowings = $0.5 \times 17 = 8.5$

Rupee earned by other resources should increase by

$8.5/83 \times 100 = 10.24\%$
